# 30th Anniversary 1981-2011

2011 marks 30 years of business for Andrew Isles Natural History Books. Check our website for promotions and events marking this occasion.

## *A word from Andrew Isles:*

*In April 1981 I started my business with the intention of specialising in natural history. Thirty years later this intention is unchanged although the occasional foray into Australiana, Antarctica, travel and exploration is tolerated. Over the past thirty years the changes in the book trade have been immense and could not have been predicted in 1981. This is of course due to the advent of the computer and the huge changes the electronic world has brought to bear on commerce.*

*We have been fortunate to build the business from the tiniest of bases into one of the largest natural booksellers in the world. Over the years we have handled many fine antiquarian titles but continue to develop the new and secondhand book business with an emphasis on the better semi-technical monographs in all fields of natural history.*

## Register or Update Your Email Address
