

A Century of Parrots

What the reviewers said:

Anyone who has been involved in aviculture will find this book engrossing. A great strength of the narrative is that Rosemary knows many of the personalities involved. This lets her bring an intimacy to the portraits of the people she is writing about...

*...Her great affection for and understanding of parrots shine throughout the book, which reflects her overwhelming concern for their future. You are left with the conclusion that parrot conservation needs people with Rosemary Low's commitment and knowledge... This is one of the most readable books that I have picked up in a long time. – **David Alderton, Cage & Aviary Birds, July 5 2007***

*...this new publication by Rosemary Low provided me with hours of very informative reading on the history of aviculture. Never before has an author brought together such a wide array of information about the early days of our hobby. – **Warwick Remington, Australian Aviculture, July 2007.***

*It is a page-turning story in spite of the poignancy of so much of what she reports. She has experienced this dramatic period in parrot history from a number of different angles, pet-keeper, curator of parrot collections, traveller to the tropics, narrator and conservationist, therefore what she has to say needs to be taken seriously... Low has unearthed a wealth of fascinating details about the early collectors, private individuals and zoos, and the successes of their breeding endeavours. – **Dot Schwarz, Parrots magazine, April 2007.***

*Una obra escrita con una claridad y una concision admirables, llena de ilustraciones, rica en anécdotas y sumamente entretenida. (A work written with an admirable clarity and concision, full of illustrations, rich in anecdotes and extremely entertaining.) – **Francisco Lapuerta, Hablemos de Loros, April-May 2007.***
